EXPERIENCE

IT Leader   March 2025 - Present
IT Support Technician   *In Office*
- Installation, configuration, and updating of servers, routers, and switches at various locations, according to IT infrastructure requirements.
- Diagnostics and troubleshooting of issues related to computers, peripheral devices, and networks, including on-site technical support for end users.
- Support in the management and administration of computer systems and applications, including installation, configuration, and updating of software and operating systems.
- Management and organization of rack cabinets – installation, maintenance, and optimization of network devices to ensure system continuity.
- Technical support in companies and public institutions and participation in projects related to IT infrastructure modernization and the implementation of new technological solutions.

Sportsmania S.C.   Jan. 2023 - Dec. 2023
Junior Web Developer   *Remote*
- Responsible for the maintenance and development of an online store based on the PrestaShop platform.
- Implemented updates, new features, and enhancements to improve user experience. Ensured regular updates and the proper functioning of the store.
- Ensured regular updates and the proper functioning of the store. Utilized technologies such as JavaScript (for plugin implementation), PHP, and MySQL in the process.

Sportsmania S.C.   March 2022 - May 2022
WordPress Developer   *Remote*
- Independently designed and developed two websites for the brands Razzo and 7Sports, based on the WordPress CMS platform.
- Integrated the websites with databases using PHP and MySQL, enabling dynamic content management and optimizing their functionality.
- JavaScript was used specifically for creating and modifying plugins.

PROJECTS

BetterRest | *Swift, SwiftUI, CoreML, CreateML, Git, Xcode*   2023
- The app was built to help coffee drinkers get a good night's sleep by asking them three questions
- Once we have these three values, we'll feed them into Core ML to get a result telling us when they should go to sleep
- Using a technique called regression analysis, we can ask a computer to come up with an algorithm capable of representing all of our data
- This in turn allows the algorithm to be applied to fresh data it has not seen before and get accurate results

iExpense | *Swift, SwiftUI, Foundation, Git, Xcode*   2023
- It's an expense tracking app that separates personal expenses from business expenses
- After adding the expense and selecting the type we get two lists of business and personal expenses
- Our spending values will glow in different colors depending on the purchase value

Technical Skills

Networking: Networks, Switching, Routing, Wireless Essentials
Web and App Development: HTML, CSS, JavaScript, SQL, PHP, Swift, SwiftUI
Tools: Git, WordPress, PrestaShop, Microsoft Office

Certifications

CKE: Diploma of Professional Qualification of IT Technician
CISCO: CCNAv7 Introduction to Networks; CCNAv7 Switching, Routing, and Wireless Essentials

Additional

Languages: Polish - Native, English - B2
Driving license: Category B
